Python Back-end developer

Uzprogers company

I work as a python back-end developer at Uzprogers company. I do interesting projects in this company. I work online at the company and sometimes I work with servers and check projects, in the company we use new and interesting things more, the quality and speed of the projects we do in the company are more often monitored. I am still working as a back-end developer at Uzprogers company.

IT CTIY academy company

Python Back-end mentor

I worked as a python back-end teacher in IT City Academy learning center. I have made a contract for 11 months of working period and taught more than 50 pupils in IT City academy. My students are working and gaining experience in official workplaces. To be honest, I love teaching and exchanging my experiences with others

Qwerty AI-Fajr company

Python back-end davelepor

I was employed as a python backend developer by Qwerty AI- Fajr company in 2021. We created several interesting bots, especially when we did projects, we used Django, Django Rest Framework, and Telegram bots. Qwerty AI-Fajr company was the first place to work with my group.
